Objective

I am looking for an opportunity to continue my computer science career. My aim is to apply my education and experience in new scenarios while further expanding my knowledge and experience.

Skills

Languages	Software	Technologies
C, C#, C++	Microsoft Windows, Linux	SQL
JavaScript, HTML5, PHP	Visual Studio	Git
Java	MySQL Workbench	FTP
Visual Basic, VBScript	Eclipse IDE	Amazon Web Services

Education

Mansfield University of Pennsylvania   Attended 2015 – 2017
Bachelor of Science, Computer Science   *Graduated in May 2017*

Susquehanna University   Attended 2012 – 2014
Bachelor of Science, Computer Science   *Transferred from university*

Experience

B2BGateway.net – Hope Valley, Rhode Island
December 2017 – Present
Maintenance Programmer
Examined and modified existing code to identify how the code functions, identify and repair issues with the code, expand the functionality of the code, and answer questions about the code's functionality. Utilized repositories to update code and research the history of code to identify the sources of issues.

Revature – Reston, Virginia
June 2017 – October 2017
Associate Software Developer (training only)
Received workplace-oriented training in various client-side and server-side technologies. Technologies included HTML5, CSS, Bootstrap, JavaScript, C#, RESTful web services, and SQL databases. Also received training in extensive customization, developing plugins, and developing custom workflows for online Microsoft Dynamics 365 instances.
